DETAILS

Leiderdorp, Netherlands
Dutch nationality
Born 1987

CORE STACK

AWS / Azure
Terraform / Kubernetes
TypeScript / Python / C#
Go / Node.js
Next.js / React
GraphQL
OpenTelemetry
Commercetools

PROFILE

Senior software consultant specialising in cloud-native e-commerce for medium and large enterprises. Comfortable operating as a hands-on developer, system architect, staff engineer, or team lead. Focused on pragmatic delivery, resilient platforms, and teams that can own what they build.

HIGHLIGHTS

Frasers Group | 2022-2026

Lead Developer / Staff Engineer, via LabDigital

Led work across two major platform transitions: from on-premise infrastructure to AWS, and later from AWS to Azure. Delivered the initial TypeScript, Next.js, Commercetools, GraphQL, and AWS platform migration. Led a C# squad replacing batch processing with an event-driven, real-time service layer, then led the platform squad with a focus on OpenTelemetry and observability.

Ahold Delhaize / Gall & Gall | Nov 2015-Sep 2018

Senior Developer / Lead Developer

Led the migration of Gall & Gall's loyalty platform from an externally managed MSSQL/C# application to a new Django and PostgreSQL system. Later helped create a wine recommendation experience with a domain expert, then rebuilt and migrated the full online stack to on-premise Kubernetes in three months and supported it in production for eight months.

SELECTED ENGAGEMENTS

ThuisApotheek.nl | 2022-2023

Software Developer

Supported the product's initial development and built its PostNL integration using Django and AWS.

Knives & Tools | 2021

Full-stack Developer

E-commerce delivery with Next.js, GraphQL, TypeScript, Python, AWS, Terraform, and Commercetools.

Discogs | 2021

Full-stack Developer

Built a new marketplace integration using Kubernetes, Next.js, GraphQL, TypeScript, and AWS.

Glen Dimplex e-commerce | 2021

Lead Developer

Led a headless commerce integration spanning brand sites worldwide, built with Azure Functions, Terraform, Python, TypeScript, React, and Commercetools.

CAREER

LabDigital | 2018-present

Senior Consultant

Consulting and delivery across enterprise e-commerce programmes. Roles have ranged from full-stack development through architecture, staff engineering, and team leadership, with a consistent focus on cloud platforms and sustainable engineering practices.

Maastricht University | 2018

Consultant

Advised on consolidating infrastructure for several project and grant websites, and designed and implemented custom sites using Django and Wagtail CMS.

Developers.nl | 2013-2018

Senior Developer / Python Lead

Spent the first five years of my career consulting across enterprise clients. Progressed to lead the agency's Python chapter while remaining active in delivery roles.

SELECTED ASSIGNMENTS

Danone e-commerce | 2018-2021

Full-stack Developer, via LabDigital

Built a headless commerce platform used across Danone websites worldwide. Worked across AWS Lambda, Terraform, Go, Python, TypeScript, React, and Commercetools; also contributed to open-source Terraform providers written in Go.

Solvinity | May 2014-Nov 2015

Senior Software Engineer

Worked in a ten-person DevOps team on a microservices platform with strong TDD, BDD, and continuous integration practices. Technologies included Docker, RabbitMQ, Consul, Python, and Django.

Vodafone | 2013-2014

Software Engineer

Developed the multi-country backend for Vodafone's business ISP services: shipping new modules, improving legacy code, and integrating external systems.
